### ***Information Disclosure Statement***

The IDSes filed 4/05, 9/05 and 3/06 have all been considered and placed of record. The initialed copies attached herewith.

### ***Specification***

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The disclosure should be carefully reviewed to ensure that any and all grammatical, idiomatic, and spelling or other minor errors are corrected.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2838

Claims 23-43 and 94-107 are rejected under 35 U.S.C. 102(b) as being anticipated by Gartstein et al. (US 6,074,775). The reference discloses a battery pack having a built-in controller that controls the functions of the pack wherein the cells feed power to the controller and a circuit allows the controller to operate even at low operating voltage. The controller operates to allow a boost in voltage whenever the voltage is below a threshold. See column 11, lines 25-35; column 16, lines 5-40.
